## PROJECTS

---

### Book Buddy

A web app providing an all-access hub for people to keep track of books read and receive recommendations on similar books. It also provides a platform for small/independent authors to publish their works to assist in gaining exposure. Designed with Agile methodology in a team of six.

### WeatherMe

A dynamic, responsive weather app that utilizes the OpenWeatherMap API to display the current weather/five day forecast asynchronously.

### Automobile Part Database

A database with a user-friendly front end created for quality engineers and paintline managers in order to make the process of identifying and finding information on parts more accessible and efficient across three neighbouring plant locations. (Done during Magna Internship)

### TrillaVibes

A website created for TRILLA, a well renowned producer in the Toronto music industry. Deployed on a Vultr instance with Nginx.

### Visionary Recruitment

A job recruitment Wordpress website created for Visionary Recruitment Inc, a private contracting agency based in Toronto. Implemented SEO practices in order to increase search engine ranking and online social presence.

## EXTRA CURRICULAR

---
