PROFESSIONAL SUMMARY

Detail conscious full stack web developer with a focus on user experience and elegant design. Created and designed a cross-plant database for engineers and QA managers to increase accessibility and reduce lookup time for automobile parts by ~30%. Consistently receive great feedback from freelance clients, including job board, e-commerce and music display websites.

EXPERIENCE

MAGNA INTERNATIONAL

Toronto, Ontario

Database Developer

May 2018 – August 2018

- Designed a PHP database with an MSSQL backend for 600+ actively manufactured automobile parts in order to reduce paint usage and increase accessibility for part info
- Scheduled and conducted weekly meetings with quality engineers and systems managers to obtain specifications and provide updates on progression on the project
- Liaised with various car manufacturer dealerships to establish ongoing relationships and obtain information for database

RECONNECT IT

Toronto, Ontario

Freelance Web Developer

Dec 2017 – Present

- Designed a static music display website with custom CSS animations for Spade, an upcoming hip-hop/electronic producer for the release of his fifth production project, "Shlomo"
- Leveraged WordPress to create a website and establish brand presence for Visionary Recruitment, a job recruitment agency based in Brampton
- Currently working on a professional business website with booking and Beatstars API integration for SignatureBySB, a well renowned multi-genre producer based in Toronto. Utilizing React/Redux, Gulp and Google Analytics to solve the discontinuity between him and his clients

PROJECTS

BOOK BUDDY

A library web app providing an all-access hub for people to keep track of books read and receive recommendations on similar books. Designed with agile methodology in a team of six.

WEATHERME

A dynamic, responsive weather app that utilizes the OpenWeatherMap API to display the current weather/five day forecast asynchronously with AJAX calls.

HAVERMAP

A geolocation-based web app that provides the distance from your current location to a specified location on a visual MapBox marker map using the geolocation API.
