---

**Ryerson University**  
*Bachelor of Computer Science (B.Sc.)*

**Toronto, Ontario**  
2019

## SKILLS

---

**Languages:** HTML5, CSS3 (SASS/SCSS), JavaScript (ES6/7), SQL

**Tools/skills:** NodeJS, React, jQuery, Pug, Docker, Git, Chrome Dev Tools, WEM, JIRA, Gerrit, Confluence, Photoshop, Adobe Target, A/B Testing, W3C Compliance, Responsive design

## EXPERIENCE

---

**ARCX Inc.**  
*Full-stack Developer*

**Toronto, Ontario**  
2021

- Developed a RESTful API for the company site with a full-stack workflow including HTML, CSS, JavaScript, Node.js, MySQL, Express.js and Pug
- Worked alongside software and hardware teams to debug and deliver user-friendly, full stack SaaS features for industry leading automotive manufacturers
- Participated in daily scrum meetings to discuss progress, customer requirements, roadblocks and deployment strategies

**BMO Financial Group**  
*Front-end Developer*

**Toronto, Ontario**  
2019 – 2021

- Developed custom, personalized web experiences for high-traffic web pages via A/B testing and experience targeting in order to drive customer conversion
- Collaborated closely with product owners and digital managers regarding initiative requirements, planning, development and deployment for various lines of businesses within the bank
- Provided mentorship to junior developers by performing code reviews and hosting peer programming sessions in an Agile environment

**Reconnect IT**  
*Front-end Developer*

**Toronto, Ontario**  
2017 – 2019

- Utilized multiple APIs with Google Analytics to enable segmentation of target audiences and receive timestamped bookings
- Designed a one-page website with custom CSS animations for a music production company to establish clearer brand presence and increase stream traffic
- Leveraged WordPress for a recruitment company to create a site that allowed users to apply to generated job postings
