## SUMMARY

Experienced front-end developer with a strong track record of delivering high-impact features and optimizing web performance. Proven ability to increase customer acquisition, enhance customer lifetime value, and streamline manufacturing processes.

## EXPERIENCE

**Front-end Developer**                                                                       Nov 2021 – Present
*Goodfood Market Corp – Toronto, ON*
- Developed and shipped web features with Next.js in a backend for frontend (BFF) pattern as part of a fast-paced, agile development team
- Optimized key web performance metrics such as reducing Largest Contentful Paint (LCP) and total number of network requests via memoization, code splitting and platform version upgrades
- Achieved a 12% increase in customer acquisition through ownership of high-impact funnels such as upsell flow and referral programs while transitioning to a newly built site
- Implemented a monorepo between web and mobile apps to consolidate backend services

**Full-stack Developer**                                                                        May 2021 – Oct 2021
*ARCX Inc – Toronto, ON*
- Created a RESTful API with Node.js and Express.js to allow customers to view detailed specs on various manufacturing execution system (MES) tools
- Developed frontend SaaS solutions for MES dashboards on automobile production floors, increasing operator quality of life
- Designed a database query interpreter to parse XML and map data to front-end components

**Front-end Developer**                                                                        Jun 2019 – May 2021
*BMO Financial Group – Toronto, ON*
- Developed customer targeted web experiences for high traffic web pages to drive lead generation, resulting in an average increase of customer lifetime value by 4%
- Collaborated closely with product owners and digital managers regarding project requirements, feasibility, and potential experiment impact across the business
- Provided mentorship to junior developers via code reviews and peer programming sessions to aid their transition to intermediate

**Front-end Developer**                                                                        May 2018 – Sep 2018
*Magna International – Toronto, ON*
- Designed and shipped a front-end dashboard for automobile part surface area measurements to reduce operator referencing time by over 30%
- Implemented CRUD operations with authentication to allow admins to add/modify part data, deprecating the manual process entirely
- Hosted the dashboard on an internal network to enable production floor access on approved devices

## EDUCATION

**Ryerson University**                                                                                          May 2019
*Bachelor of Computer Science (B.Sc.) – Toronto, ON*

## SKILLS

**Languages:** HTML, CSS, JavaScript
**Libraries and Frameworks**:  React.js, Next.js, Express.js, Tailwind, Sass
**Development Tools**: Node.js, React Query, Redux, Jest, Cypress, New Relic, GraphQL, Yarn, npm
