EXPERIENCE

ARCX Inc.   **Toronto, Ontario**
Full-stack Developer   *2021*

- Developed a RESTful API for the company site with a full-stack workflow including HTML, CSS, JavaScript, Node.js, MySQL, Express.js and Pug
- Worked alongside software and hardware teams to debug and deliver user-friendly, full stack SaaS features for industry leading automotive manufacturers
- Participated in daily scrum meetings to discuss progress, customer requirements, roadblocks and deployment strategies

BMO Financial Group   **Toronto, Ontario**
Front-end Developer   *2019 – 2021*

- Developed custom, personalized web experiences for high-traffic web pages via A/B testing and experience targeting in order to drive customer conversion
- Collaborated closely with product owners and digital managers regarding initiative requirements, planning, development and deployment for various lines of businesses within the bank
- Provided mentorship to junior developers by performing code reviews and hosting peer programming sessions in an Agile environment

Reconnect IT   **Toronto, Ontario**
Front-end Developer   *2017 – 2019*

- Utilized multiple APIs with Google Analytics to enable segmentation of target audiences and receive timestamped bookings
- Designed a one-page website with custom CSS animations for a music production company to establish clearer brand presence and increase stream traffic
- Leveraged WordPress for a recruitment company to create a site that allowed users to apply to generated job postings
