SUMMARY

Senior Frontend Developer with 8+ years of experience building performant web applications using React, Next.js, and TypeScript. Skilled in frontend architecture and performance optimization, with contributions to Interac's Konek launch (~10K users) and a 12% increase in customer acquisition at Goodfood.

EXPERIENCE

Frontend Developer **Jun 2025 – Nov 2026**

Interac Corp – Toronto, ON

- Built core onboarding, checkout, and profile experiences for Konek, Interac's Canadian digital wallet, supporting ~10K users at launch with zero critical post-launch bugs
- Created interactive demo applications showcased at four in-person events with Canadian financial institutions, demonstrating real-world Konek use cases
- Executed a rebranding initiative across three Angular codebases, unifying customer-facing and internal applications under a consistent design system

Frontend Developer **Nov 2021 – Jun 2025**

Goodfood Market Corp – Toronto, ON

- Built customer-facing onboarding, checkout, and menu selection experiences using Next.js and a Backend-for-Frontend (BFF) architecture, serving ~100K customers
- Reduced Largest Contentful Paint (LCP) by 3+ seconds on high-traffic pages and improved Cumulative Layout Shift (CLS) through code splitting, skeleton loaders, and platform upgrades
- Increased customer acquisition by 12% through conversion funnel optimizations and a new Contentful-powered website, while improving code reuse across web and native apps through a shared monorepo

Fullstack Developer **May 2021 – Oct 2021**

ARCX Inc – Toronto, ON

- Built Manufacturing Execution System (MES) dashboards displaying tool specifications and production information for 20+ automotive production-floor operators
- Developed an XML-based query interpreter that mapped 15+ data sources to frontend components, enabling dynamic rendering of MES data across dashboards
- Implemented Node.js and Express REST APIs to provide real-time MES tool specifications to operator dashboards, improving data accessibility and reducing production-floor delays

Frontend Developer **Jun 2019 – May 2021**

BMO Financial Group – Toronto, ON

- Optimized high-traffic web pages serving 10M+ monthly users, contributing to lead generation and a 4% increase in average customer lifetime value
- Collaborated with product owners to analyze competitors, define frontend requirements, and identify opportunities to reduce bounce rates across acquisition channels
- Implemented A/B and multivariate tests for personalized product recommendations, increasing click-through rates by an average of 3% across winning tests

EDUCATION

Toronto Metropolitan University (formerly Ryerson University) **May 2019**

Bachelor of Computer Science (B.Sc.) – Toronto, ON

SKILLS

Languages/Frameworks: JavaScript, TypeScript, HTML, CSS, React, Next.js, Angular, NgRx, Redux, Node.js, Tailwind CSS
Tools/Testing: Git, Jest, Cypress, Jenkins, Webpack, GraphQL, New Relic, Yarn, npm
