SUMMARY

Senior Frontend Developer with 8+ years of experience building performant, user-focused web applications using React, Next.js, and Angular. Experienced in frontend architecture and performance optimization, contributing to Konek's launch at Interac with ~10K users and driving a 12% increase in customer acquisition at Goodfood.

EXPERIENCE

Frontend Developer Jun 2025 – Nov 2026

Interac Corp – Toronto, ON

- Contributed to the launch of Konek, a Canadian digital wallet for secure, real-time payments, building onboarding, checkout, and profile experiences for approximately 10K users at launch
- Built interactive demo applications showcased at four in-person events with Canadian financial institutions, enabling stakeholders to explore real-world Konek use cases
- Executed a rebranding initiative across three Angular codebases, unifying customer-facing and internal applications under a consistent design system

Frontend Developer Nov 2021 – Jun 2025

Goodfood Market Corp – Toronto, ON

- Developed and shipped web features such as onboarding, checkout, and menu selection with Next.js in a backend for frontend (BFF) pattern serving ~100K customers
- Reduced Largest Contentful Paint (LCP) by 3+ seconds on high-traffic pages and improved Cumulative Layout Shift (CLS) through code splitting, skeleton loaders, and platform upgrades
- Increased customer acquisition by 12% by improving high-impact conversion funnels, including upsell flows and referral programs, and building a new Contentful-powered website
- Implemented a shared monorepo for web and native applications, reducing duplicated code and enabling greater reuse of shared components and business logic

Fullstack Developer May 2021 – Oct 2021

ARCX Inc – Toronto, ON

- Built Manufacturing Execution System (MES) dashboards displaying tool information for automotive production-floor operators
- Developed an XML-based query interpreter that mapped source data to frontend components, enabling dashboards to render MES data directly
- Built REST APIs with Node.js and Express to deliver MES tool specifications to operator dashboards in real time

Frontend Developer Jun 2019 – May 2021

BMO Financial Group – Toronto, ON

- Optimized high-traffic web pages serving 10M+ monthly users, contributing to lead generation and a 4% increase in average customer lifetime value
- Partnered with product owners to assess competitor strategies, define requirements, and identify opportunities to reduce bounce rates
- Implemented A/B and multivariate tests for personalized product recommendations

EDUCATION

Toronto Metropolitan University (formerly Ryerson University) May 2019

Bachelor of Computer Science (B.Sc.) – Toronto, ON

SKILLS

Languages/Frameworks: JavaScript, TypeScript, HTML, CSS, React, Next.js, Angular, NgRx, Redux, Node.js, Tailwind CSS
Tools/Testing: Git, Jest, Cypress, Jenkins, Webpack, GraphQL, New Relic, Yarn, npm
